

LightCMS

OUR NEW CARD MANAGEMENT SYSTEM

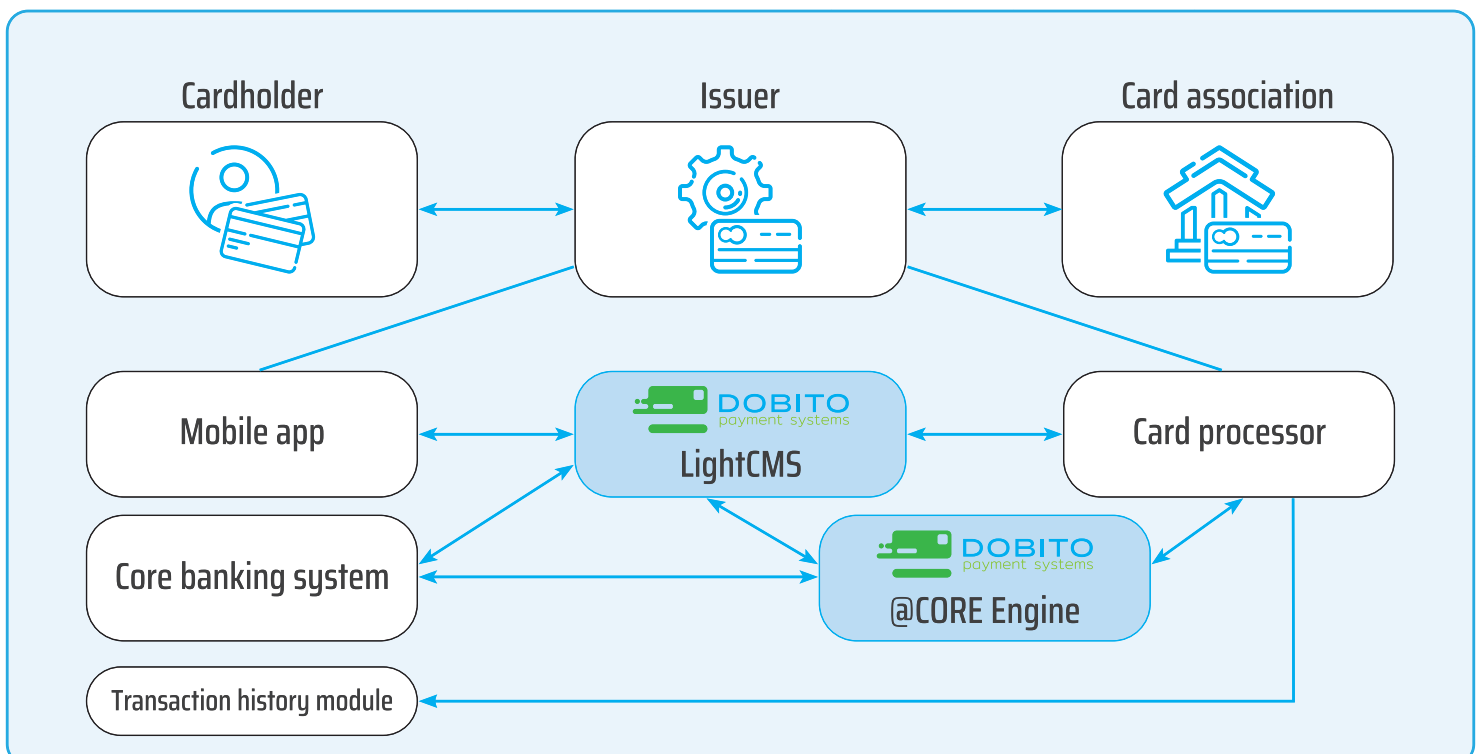

At DOBITO, we understand that every organization and payment system is unique, and we recognize the necessity to customize our solutions to accommodate your specific needs.

We are excited to unveil our latest solutions - **a card management platform and issuer authorization engine**. Our commitment to enhancing client efficiency through cutting-edge technology is showcased in these innovative products. Experience a new level of efficiency with our advanced solutions.

Our new card management system facilitates streamlined card issuance and management processes, tailored to accommodate diverse business requirements.

Meanwhile, **our authorization engine** streamlines transaction processing via sophisticated routing

rules. It utilizes dynamic decision-making to quickly validate payments and optimize operational flow. Both solutions aim to maximize performance and save time through automation and ease of use. Backed by our dedicated support services, clients can rely on these solutions to power their payments operations effectively.

LightCMS

Your new card management system

Unlock the power of efficient card management with our innovative LightCMS. Seamlessly built to simplify your card organization process, our platform enables you to effortlessly navigate through your cards, customize their settings, and categorize them in a way that suits your needs. You have the power to oversee all aspects of the card product life cycle, which involves managing cards, accounts, cardholders, and card product definitions.

By utilizing our user-friendly interface, you'll be able to efficiently manage and organize your cards like never before.

The most significant advantages are:

- **Fast implementation of the support of new card processor**
- **Adaptable adapters for seamless integration in bank environment**
- **Various types of cards** that can be fully customized to suit different needs.
 - Payment bank cards (debit, credit, charge or prepaid), Benefit cards, Fleet cards, Loyalty cards, Membership cards, eWallets, Cryptocurrency cards, Tokens
 - Physical, virtual (digital-only) and temporary cards and digital wallets
- **Support of international card schemes** (MasterCard, VISA) and even close-loop schemes.
- **The issuance and distribution of multi-currency cards.**
- **Broad spectrum of customizable restrictions**
- **Flexible card limits** that can be completely tailored to individual spend controls.
- **Seamless introduction of new card products** to the market.
- **Guarantee effective management and control of the complete card lifecycle.**
- **Easy to implement API layer** for front-end channels
- **Support for different linkage models:**
 - single account to multiple cards
 - multiple accounts to single card
 - multiple accounts to multiple cards
